Hvordan skaber vi et attraktivt, digitalt vækstmiljø?

Anne-Lise Høg Lejre, direktør, Produktion

Digitalt Vækstpanels vision og målsætninger

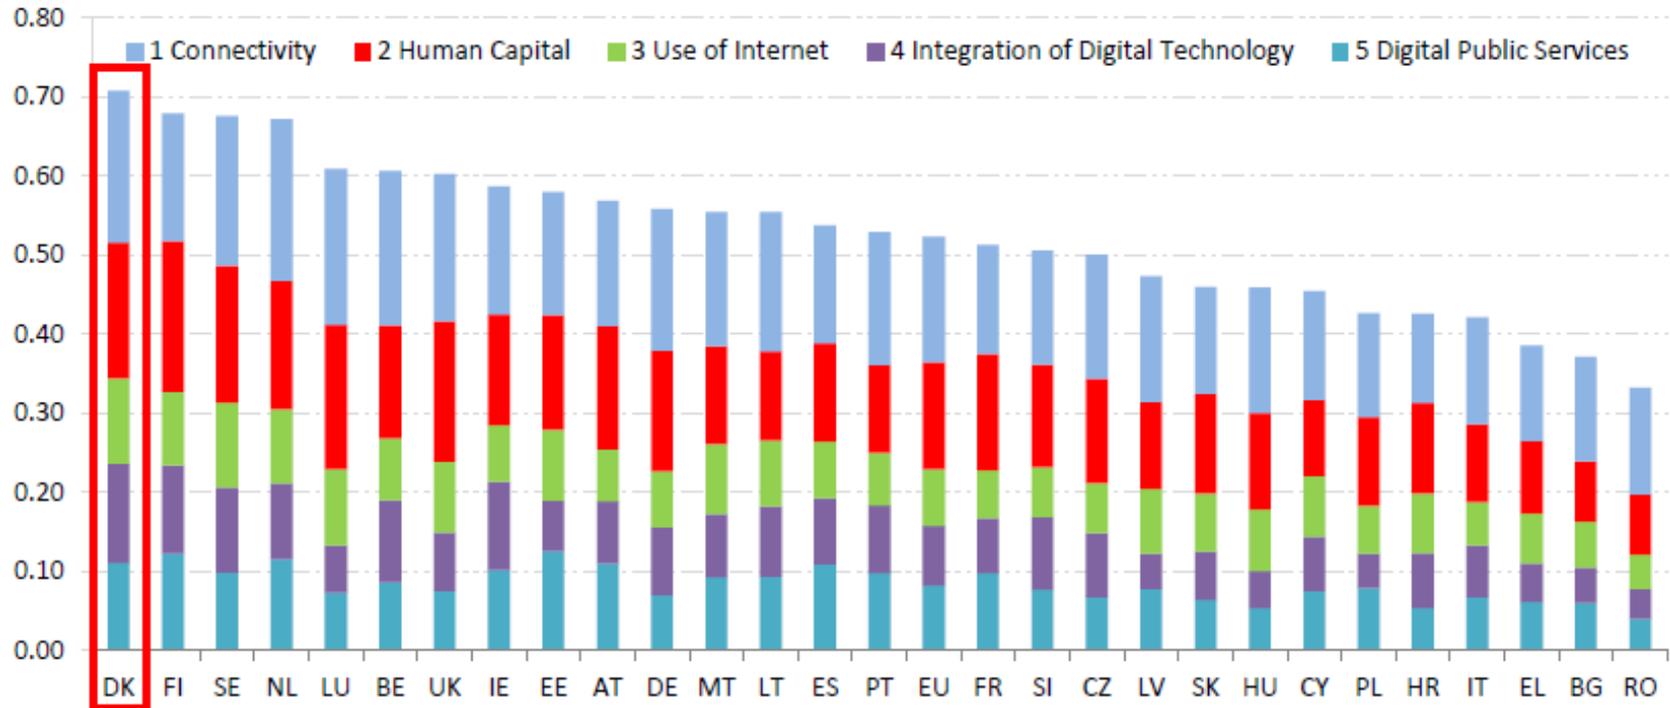

Indsatser

- Digitale kompetencer til alle
- Attraktivt digitalt vækstmiljø
- Proaktive rammer for digitalisering
- Digital ansvarlighed og begejstring

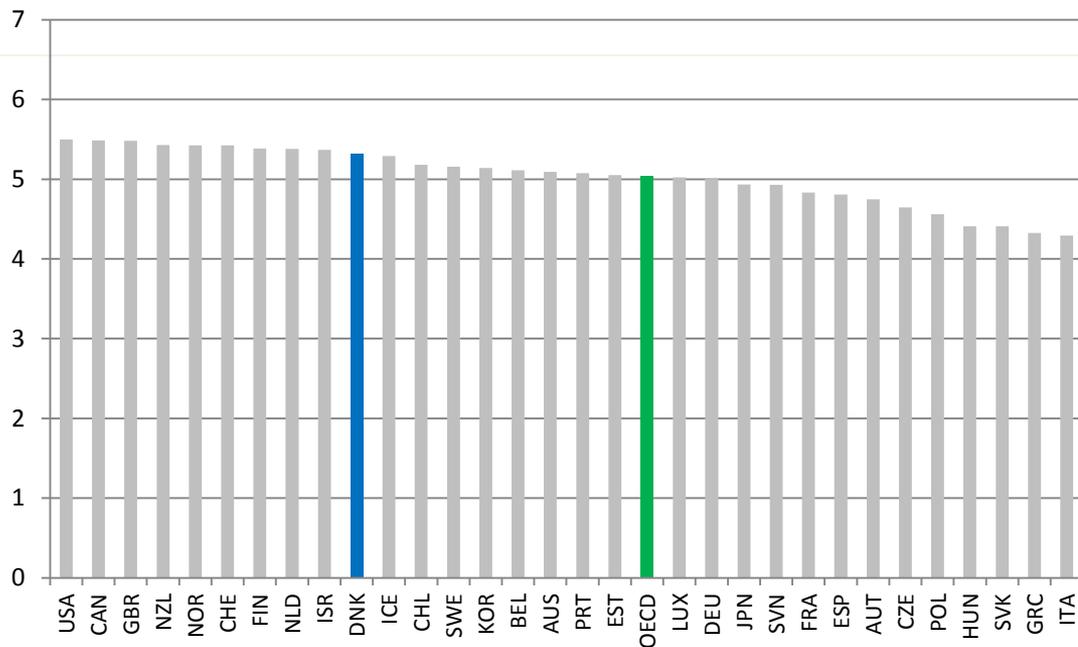

Danmarks digitaliseringsindeks

Digital Economy and Society Index (DESI) 2017 ranking

Danmark er nr. 16 på WEF Networked Readiness Index omkring innovation

Danmarks placering på WEF Networked Readiness Index for Business and innovation environment, 2016

Kilde: WEF, Networked Readiness Index (2016)

Note: Business and innovation environment indekset er en sum af en række spørgsmål til virksomhedsledere (Index 1-7) af følgende: Availability of latest technologies, Venture capital availability, Gov't procurement of advanced tech, Total tax rate, number of days to start a business, number of procedures to start a business, intensity of local competition, tertiary education gross enrollment rate % and quality of management schools .

DK halter bagefter på flere WEF indeks for Business og Innovationsmiljø.

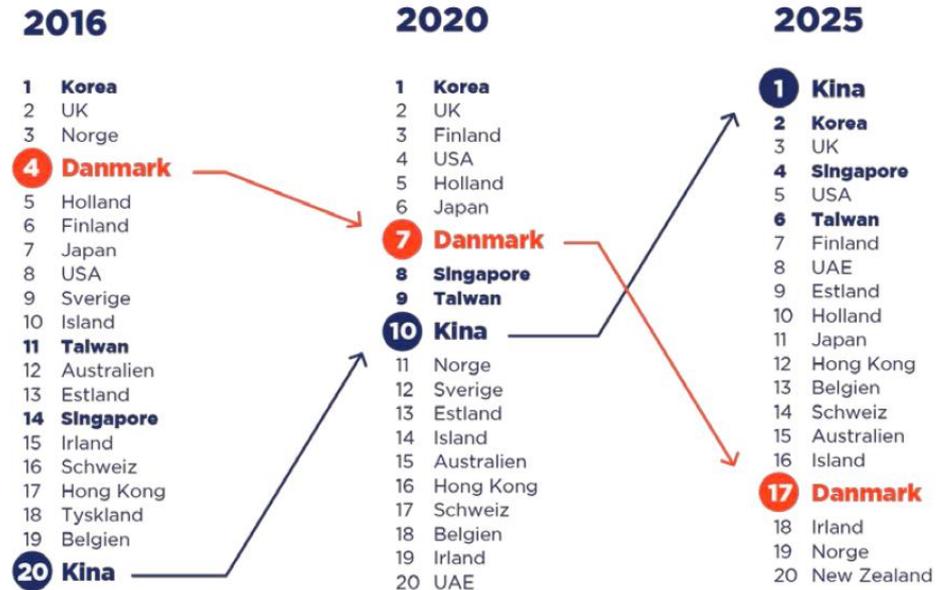

Danmark er et stykke fra toppen på særligt adgang til den nyeste teknologi, venturekapital og offentlige indkøb af avancerede teknologiske produkter.

Danmark er faldet fra en 7. i 2012 til en 16. plads i 2016. Sverige er faldet tilsvarende, hvorimod Nederlandene, Norge og Finland nogenlunde har bevaret deres placeringer.

Danmark kan miste sin digitale førerposition

- Danmarks udgangspunkt for den digitale omstilling er godt. Danmark er et af de mest digitale samfund i EU.
- Hvis man kigger frem mod 2025, er der indikationer på, at særligt de asiatiske lande vil overhale Danmarks nuværende førerposition.

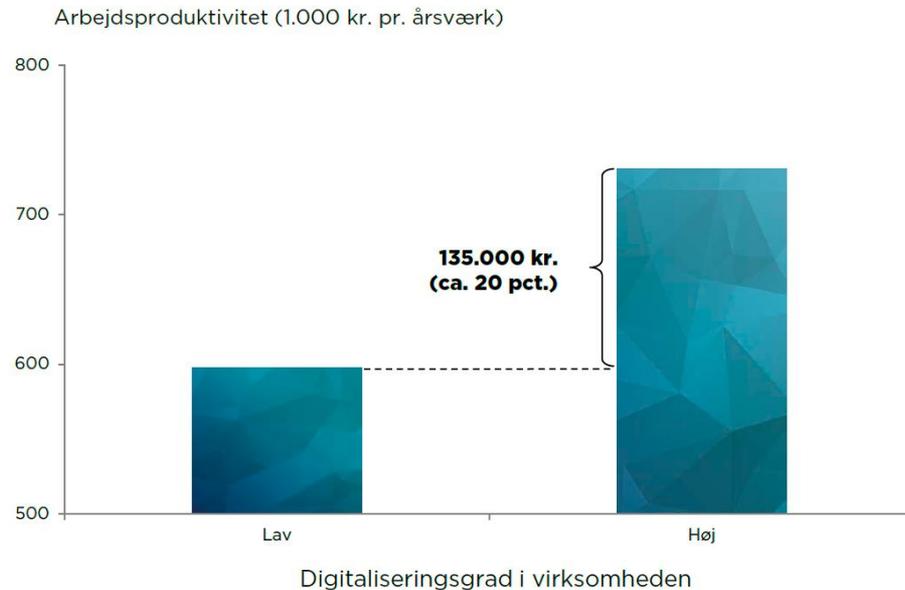

Kilde: BCG E-intensity Index (2016) og egen tilvirkning.

De mest digitale virksomheder er også de mest produktive

TEKNOLOGISK
INSTITUT

- De mest digitale virksomheder har i gennemsnit godt 20 pct. højere arbejdsproduktivitet end de mindst digitale virksomheder
- Digitaliseringsgraden måles på tværs af seks forretningsprocesser (produktion, administration og drift, analyse, markedsføring, salg og forsyningskæde).

Attraktiv digital vækstmiljø er forudsætning for Danmarks digitale omstilling

- International førende digital hub samt viden og testmiljøer
- Attraktivt land for internationale og digitale talenter
- Godt klima for digitale investeringer og adgang til kapital

Digital Innovation Hub

The Digital Innovation Hub Model

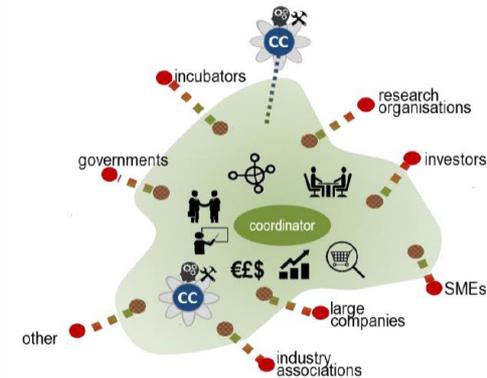

Competence Centres are the core of Digital Innovation Hubs

Digital Innovation Hub

Organised to provide services to industry

- Access to competence centres
- Development of innovation ecosystem
- Brokerage
- Access to finance
- Market intelligence
- Training and education
- Incubator/mentoring services

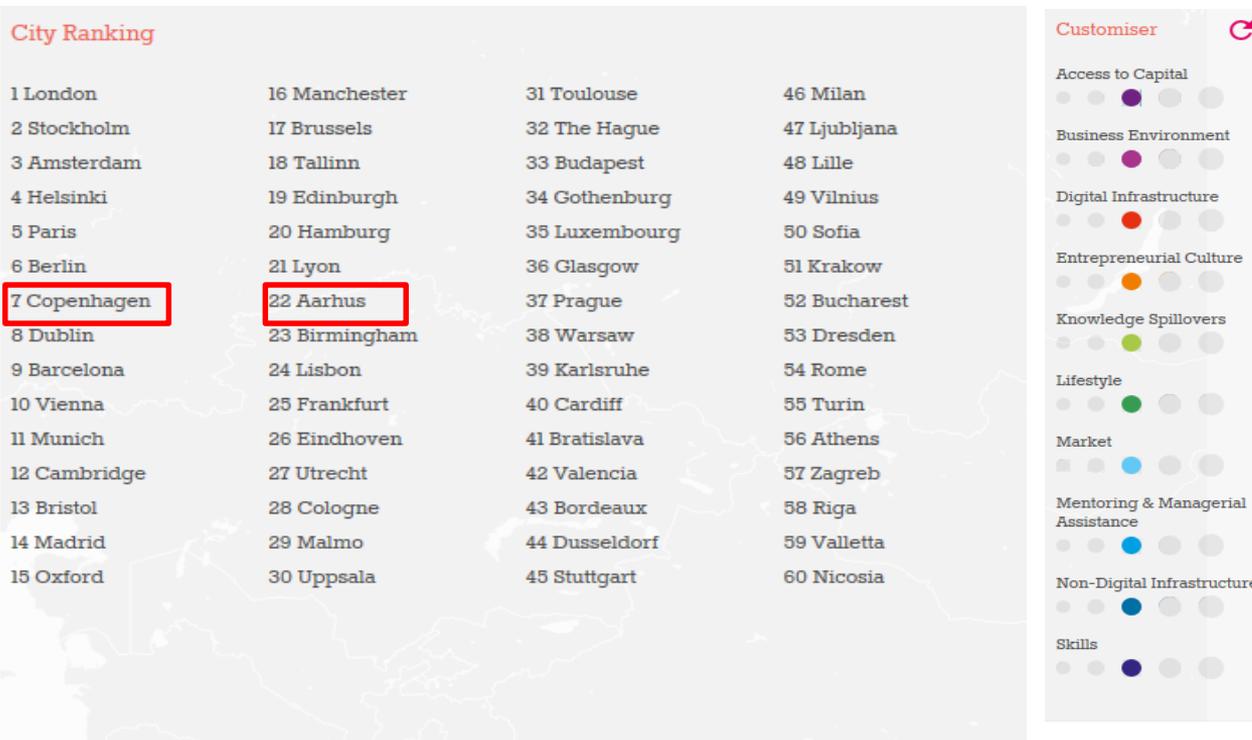

Competence Centre

Competencies in digital technologies

- Provide access to infrastructure and technology platforms
- Provide digitisation and application expertise
- Support experimentation in real-life environments
- Support fabrication of new products
- Demonstrate best practices
- Showcase technologies in pilot factories, fab-labs

Europæiske byers digitale parathed for start-up virksomheder

European Digital City Index (EDCI) om byers digitale parathed for start-up virksomheder

På en rangordning udført af EDCI om byers digitale parathed for start-up virksomheder er København på 7. plads og Aarhus nr. 22.

København er dog placeret lidt efter bl.a. Stockholm og Helsinki.

København halter særligt efter på a) access to capital, b) mentoring and managerial assistance og c) non-digital infrastructure

Kilde: EDCI (2016)

Note: EDCI indekset er en sammenvægtning af 10 underindeks på baggrund af i alt 40 variable.

Forventet mangel på 19.000 It-specialister i 2030

TEKNOLOGISK
INSTITUT

Fremskrivning af ændring i udbud og efterspørgsel af IT-specialister

27 pct. af de virksomheder, som i 2015 har forsøgt at rekruttere en IT-specialist, siger at forsøget var forgæves.

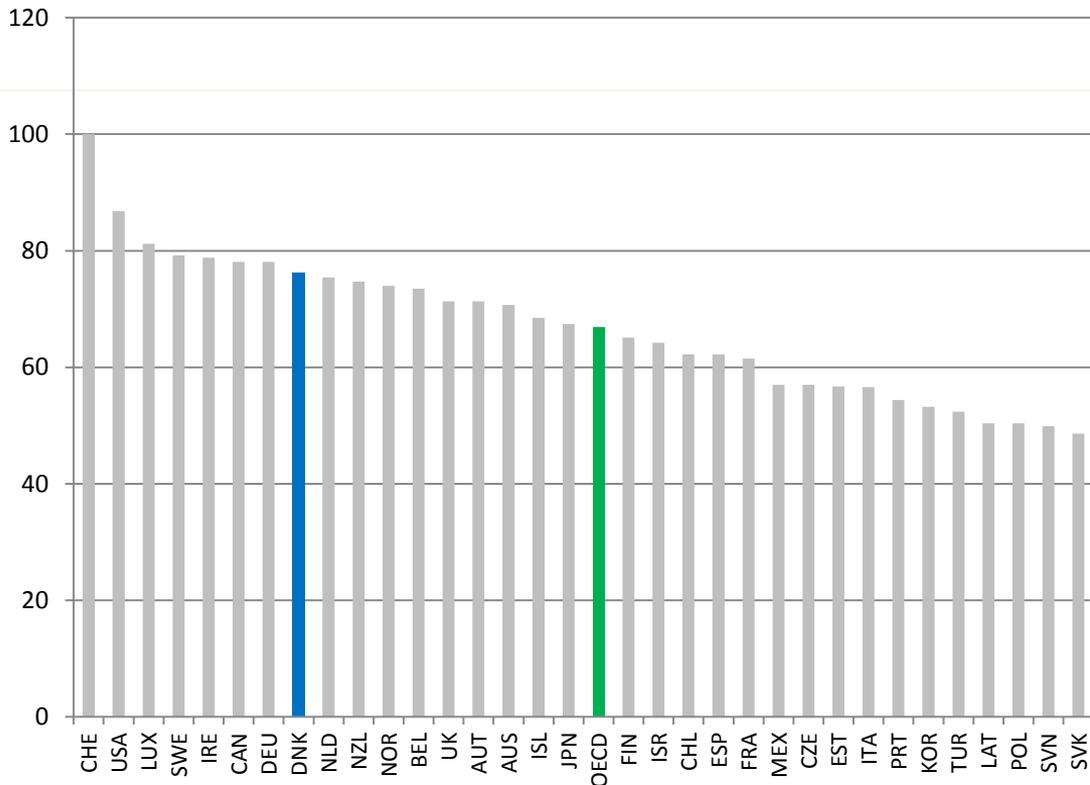

Dette mismatch mellem udbud og efterspørgsel forventes at stige, så der i 2030 vil være en mangel på 19.000 yderligere IT-specialister.

Anm.: I fremskrivningen er antaget, at den fremtidige efterspørgsel følger udviklingen i beskæftigelsen for IT-specialister i 2011-2013 (grundscenariet). Den gennemsnitlige årlige vækst i scenariet er 2,2 pct. Fremskrivningen viser også, at den udækkede efterspørgsel i grundscenariet stort set kan dækkes, hvis alle IT-uddannede fremadrettet får et IT-specialistjob, eller hvis samme andel af IT-specialistjobbene som i dag fremadrettet kan besættes af personer uden en IT-uddannelse. Det er usikkert, om disse udviklinger kan realiseres. For flere scenarieudregninger henvises til Højbjerg Brauer Schultz for Erhvervsstyrelsen mfl. (2016).

Andre lande appellere mere til udenlandske talenter

Danmarks placering på IMD World Talent Ranking, 'Appeal' indekset, 2016

Danmark halter lidt efter de bedste lande, når det handler om at appellere til udenlandske talenter. Vi er dog næsten på niveau med de andre nordiske lande.

Danmark er dog samlet nr. 2 på IMD's World Talent Ranking 2016. Det skyldes, at Danmark udmærker sig særligt ved at et højt offentligt forbrug på uddannelse, og at vi er relativt gode til at dyrke vores egne talenter

Kilde: IMD World Talent Ranking

Note: The IMD World Talent Ranking 2016, Appeal index, shows the overall ranking for OECD economies. (0-100 index) The economies are ranked from the most to the least competitive. The scores are the sum of ten factors: 1) Cost-of-living, 2) Attracting and retaining talents is a priority in companies, 3) Worker motivation, 4) Does Brain Drain have an impact in the country, 5) Quality of life, 6) Are foreign high-skilled people attracted to countries business environment, 7)Gross-annual income , 8) Total salary including bonuses and lon term incentives, 9)Effective personal income tax rate, 10) Personal security and private property rights
